## NEWS

Vol. 2, No. 1

We decided to publish our own regular newspaper to keep you the customer advised of all the many developments here at Christopher Neils of Northwich. As you know, we are the world's largest INDEPENDENT specialists in the supply of replacement or alternative parts for those wonderful cars designed and built by the late Colin Chapman (see P. 4) and our stocks of Lotus cars are usually greater AND more varied than any other source.

Newspaper and photographs can never tell the whole story so come and visit us soon. Remember, we "support the enthusiasts". —CHRIS & NEIL

Latest in a line of developments from our Continuous Engineering Department comes the long awaited C.N. Cabriolet. A convertible four seater based on the Elan +2. The outstandingly beautiful appearance of this car cannot be captured on paper and its rarity and practicality ensure increasing value.

Developed over 2 years, the design brief required the original lines to be maintained, wind noise kept to a minimum, with good visibility, and no loss of headroom when the hood is up. Hood stowage and erection is straightforward and compact. Demonstrator available at Northwich.

The total package available starts below £1000 with the Cabriolet conversion and can include any of our other developments, i.e. latest Ford 5 speed gearbox, electric pod lift, new chassis, distinctive alloy wheels. Paint and trim to your specification, in a choice of modern matching colours including metallics.
